

AMENI MHAMDI

QA Automation Engineer | ISTQB® & A4Q Certified

✉ Amenimhamdy@yahoo.com 📞 +216 52 120 300 📍 Ariana, Tunisia 🔗 My LinkedIn profile 🌐 My GitHub profile

📄 PROFILE

ISTQB v4.0 and **A4Q Selenium** certified, with expertise in **UI** and **API** test automation using **Playwright**, **Selenium** and **Cucumber**. I ensure application quality and reliability by working closely with product and development teams in Agile environments.

🛠 TOOLS & LANGUAGES

Automation tools Selenium, Playwright, Cucumber.	Bug tracking & management Jira, Xray.	API tools Swagger, SoapUI/ReadyAPI, Postman.	Programming languages Java, JavaScript, TypeScript, Kotlin, Python.
Documentation tools Confluence wiki, TestLink, Squash TM.	Messaging systems Kafka, ActiveMQ.	Data analysis & monitoring Kibana, Elasticsearch.	Web services REST.
Test management & CI/CD Jenkins, Azure DevOps.	Source control GitHub, GitLab, Git.	IDE Eclipse, VS Code, Visual Studio, Android Studio.	Mobile development Android, Dart.
Automation methodologies BDD.	Databases SQL (MySQL SQL Server) NoSQL (Firebase).	Data exchange format JSON.	Operating systems Linux, Windows.
Design Canva, Photoshop, Figma.	Modeling language UML.	Ways of working Agile Scrum.	Java frameworks JEE, Spring Boot, Hibernate, JSP.
Mobile frameworks Jetpack Compose, Flutter.	Web frameworks Angular, Bootstrap.		

🏢 PROFESSIONAL EXPERIENCE

Test Automation Engineer

Tunis, CUN

RGI Group / Sept 2025 – present

- Design, develop and run automated Frontend (Kelia UI) and Backend/API (Karma project) tests using Playwright/TypeScript and Cucumber.
- Implement BDD test scenarios covering the critical functional paths of the applications.
- Test REST APIs and validate data flows with Postman.
- Automate user interface validation to ensure compliance with business requirements.
- Identify, analyse and track defects together with the development teams.
- Implement and monitor Jenkins CI/CD pipelines for automated test execution.
- Collaborate with QA, Product and Development teams in an Agile Scrum environment.
- Continuously improve the reliability, maintainability and coverage of automated tests.

Tools: Playwright, Cucumber, Postman, Jira, Git and Jenkins (CI/CD).

Programming language: TypeScript.

Test Automation Engineer

Tunis, La Goulette

Sagemcom Software & Technologies / Aug 2024 – Jul 2025

- Design and maintain automated test suites with Selenium/Java for Smart Metering applications.
- Review test scripts and advise the team to ensure high-quality tests.
- Extend sanity test coverage up to 1,000 test cases.
- Improve test processes and adopt new technologies to increase efficiency.
- Take part in test planning and execution during software updates.
- Implement database access and manage SQL queries.
- Automate virtual machine management with Linux commands.
- Automate message retrieval from messaging systems to ensure data-flow reliability.
- Attend the validation team's progress meetings following Agile methodology.
- Write and prepare test result reports to assess product quality.
- Run regression tests on every new release to maintain stability.
- Manage bugs in Jira, covering reporting, tracking and resolution.
- Analyse defects together with the development team.
- Follow up on fixes for fast and effective issue resolution.
- Ensure automated test quality with Sonar for static analysis and quality metrics.

Tools: Selenium, Cucumber, Postman, Jira, Xray, Confluence, Git, Kibana, Elasticsearch, PgAdmin, mRemoteNG, ActiveMQ, SonarQube, Kafka and Serenity BDD.

Programming language: Java.

Test Automation Engineer

Freelance | Sept 2023 – Jul 2024

- Co-develop automated test solutions for web applications with Selenium WebDriver/TestNG.
- Design modular scripts focused on critical business flows, keeping them maintainable.
- Manage test cases in TestLink as client requirements evolve.
- Ensure test traceability with Xray to keep teams aligned.
- Report and track defects in Jira, prioritising fixes with developers.
- Automate regression campaigns to speed up validation.
- Oversee fixes for fast incident resolution.
- Write concise reports for stakeholders.

Tools: Selenium WebDriver, TestNG, Cucumber, Xray, Jira and TestLink.

Programming language: Java.

Tunis, Ariana

 INTERNSHIP

Final-year internship – Custom TV launcher

Sagemcom Software & Technologies | Feb – Jul 2023

- Design a modern UI/UX for an Android launcher dedicated to the Virtual Storytelling Box.
- Build the software architecture following the MVVM pattern for better maintainability.
- Implement dynamic interfaces with Jetpack Compose, adapted to different user profiles.
- Create mockups in Figma and interactive prototypes in Canva.
- Test REST APIs through Postman and document the technical results.
- Collaborate with the team using Jira for tracking and GitLab for version control.
- Integrate personalised recommendations to improve the user experience.
- Integrate SonarQube into the pipeline to analyse and improve code quality.

Tools: Jetpack Compose, Figma, UML, MVVM, Canva, TV Box, Photoshop, Jira Software, Postman, REST API, GitLab, LaTeX, Android Studio, Jira and SonarQube.

Programming language: Kotlin.

Tunis, Megrine

 EDUCATION

National Engineering Degree in Telecommunications

National School of Electronics and Telecommunications

2020 – 2023

Tunis, Sfax

Bachelor's degree in Information and Communication Science and Technology

Higher Institute of Computer Science

2017 – 2020

Tunis, Medenine

Bachelor's degree in Information and Communication Science and Technology

Higher Institute of Computer Science and Mathematics

2016 – 2017

Tunis, Monastir

Baccalaureate in Computer Science

Technical High School

2016

Tunis, Medenine

 CERTIFICATIONS

- ISTQB® Certified Tester Foundation Level (CTFL) – Syllabus v4.0
- A4Q Certified Selenium Tester Foundation (A4Q CST)
- Object Oriented Programming in Java
- Git Fundamentals
- Python Essentials 1 – Cisco
